

Re: Parfrey Murphy
Chartered Accountants

To Whom It May Concern

Since 2006 we have outsourced our entire accounting function for our 3 locations in Ireland to Parfrey Murphy. This has involved the computerised processing of all purchases, sales and bank account data, the maintenance of the accounts payable, accounts receivable, general ledgers and fixed asset registers together with the production of monthly management accounts for each location to agreed deadlines and the provision of the year end file to the auditors for annual audit. They also prepare and submit all VAT Returns to the Revenue authorities.

In addition Parfrey Murphy have, during this period, processed the weekly and monthly payrolls for each location and made all of the necessary Returns to the Revenue relating thereto by the due dates.

We are delighted that we selected Parfrey Murphy to carry out the above work. They are extremely professional in their approach to the assignment. They prepare accurate management accounts to the agreed deadlines which are very important to us and continue to process the various payrolls in a timely and accurate manner. Parfrey Murphy staff are also readily available to deal with any queries we may have or to deal with other accounting issues which arise from time to time in a courteous and cooperative manner.

Consequent upon the above I would, without hesitation, recommend Parfrey Murphy to any potential outsourcing client.
